

funktel D5

The state of the art office DECT telephone

- Professional audio: optimized for noisy environments (earpiece and rear-mounted loudspeaker)
- Bright 2-inch color display
- Interchangeable Li-ion battery with up to 200 hours of standby time
- MemCard slot for transfer of all settings when a device is swapped
- Abrasion-resistant, illuminated keypad
- Covered headset socket for audio accessories
- Hearing aid compatible (HAC) without audible interference on analog hearing aids
- Navigation rocker and programmable softkeys
- LED indicator and counter for unread events
- Software update over-the-air function in funktel DoIP systems

The professional office handset
for demanding users

funktel D5

Practical, handy, ergonomic

■ The funktel D5 offers users an ergonomic business handset that satisfies the most stringent demands: handy, convenient and durable – as well as being suitable for noisy environments.

You will find that the professional voice and messaging functions, tried-and-tested ergonomics and well-thought-out user prompting make a convincing proposition. Innovative menu prompting, with a clear structure and intuitive symbology, facilitates operation in any situation.

The funktel D5 can be integrated in any integral or funktel communication system and thanks to its automatic login, use at various locations is supported. In addition, GAP enables the funktel D5 to be operated in all popular DECT systems and installations.

Easy replacement: all device settings of your previous FC1 / FC4 / FC11 or D3 / D11 Series funktel handsets are imported directly via the MemCard when devices are swapped – without any manual configuration.

Particular importance has been attached to the acoustic features. The funktel D5 is also HAC-compatible with all analog hearing aids – thanks to the headset jack, the high-quality earpiece or the efficient speaker at the rear: the funktel D5 always offers telephony with the best audio quality – even in noisy and demanding situations.

Interchangeable battery:	Li-Ion, 1 200 mAh
Carry cases:	Various models – your dealer will be happy to advise

*) Depending on ringtone

***) With fully-charged battery, depending on system settings of the display illumination

MemCard

Network information and contact list data of older-generation devices are copied automatically from the MemCard (optional) to the internal memory. This enables devices to be exchanged easily, even without the intervention of a technician.

Innovative menu prompting

The menu has been developed from scratch and the logical menu structure enables intuitive operation of numerous convenience features.
